EUROMAC Company,

located in Gdynia, is an international supplier of high quality professional foam guns. We consistently enlarge product ranges to meet customers' requirements. With our highly qualified and trained staff you can depend on cost-effective and convenient products. Our consultants are available to provide technical support at every stage of the production process. Many years of experience, superior service and customer satisfaction make us one of the leaders in the commercial contractors market.

Adaptation and flexibility are key features in the product development process. We offer you the possibility of differentiating yourself in relation to your competitors by customized labelling of our products with your logo. We also know that our customers value the delivery reliability. The finished products are delivered in Europe within 7 working days.

Most of our total production goes to export. We ship to over 30 countries worldwide and handle all types of consignments from full load containers to small express parcels. We offer a secure delivery thanks to our cooperation with companies such as DHL and SCHENKER.
